Certificate Import Wizard

Welcome to the Certificate Import Wizard

This wizard helps you copy certificates, certificate trust lists, and certificate revocation lists from your disk to a certificate store.

A certificate, which is issued by a certification authority, is a confirmation of your identity and contains information used to protect data or to establish secure network connections. A certificate store is the system area where certificates are kept.

3. Run Suppliers.UWP_2.3.5.0_x86.appxbundle

Possible problems
Some computers are missing some Microsoft files that are required to install the
application. In these cases a message like this will appear:
"App Installer failed to install package dependencies"

The files / packages are in the Dependencies folder. Double-click on them and after
they are installed run the Suppliers.UWP_2.3.6.0_x86.appxbundle again.
